

How to Take Care of Your White Top

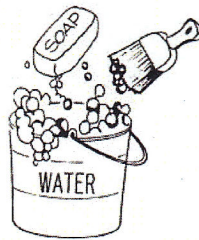

Cleaning your White Top:

To clean your white top you can wipe off any dirt using a damp Mr. Clean Magic Eraser.

You can also use a tooth brush and **white toothpaste**, and scrub your cap clean.

If you do not have these (these items are suggested) you can use soap and warm water to scrub your cap with.

Make sure that your chin stay is sewed in to the correct length.

As well, make sure your cap tally is straight: the space between RCSCC and Whitby should be centered with the line on the front your cap.

The bow of your cap tally should also be centered on the left side of your cap below the two air holes.

An easy way to keep your cap clean after cleaning it, is to put a shower cap on it. (These can be bought inexpensively at the dollar store)
